TEXT-BOOKS AND SYLLABUS PRESCRIBED FOR THE EXAMINATIONS OF 1923.

MATRICULATION EXAMINATION.

Three papers will be set. One paper will be set from the prescribed course in Prose and Poetry with questions on Grammar and Idiom. A second paper will be set on 'unseen' passages with questions on Grammar and Idiom. A third paper will include (a) passages in an Indian vernacular (Urdu, Hindi, Mahratti, Gujrati, Bengali, Parbatia, Tamil, Telugu, Uriya) for translation into English; (b) a simple narrative or descriptive composition. In the case of candidates who offer English as their *mother-tongue*, the third paper will consist of an Essay.

Mathematics.

There will be two papers in Mathematics, one paper in Arithmetic and Algebra, and a second paper in Geometry.

The courses shall be as follows :—

- (1) *Arithmetic*.—The whole of Arithmetic. (The use of Algebraical symbols and processes will be permitted.)
- (2) *Algebra*.—The four simple rules, Fractions, Greatest Common Measure, Least Common Multiple, Factors, Remainder Theorem, Proportion, Simple Equations of one or more unknown quantities with easy problems, Quadratic Equations, Graphs and their application.

(Candidates will be provided with squared paper.)

- (3) *Geometry*.—Practical and Theoretical Geometry.

The questions on Practical Geometry will be set on the constructions contained in the annexed Schedule A, together with easy extensions of them. All figures should be drawn accurately, for which purpose every candidate should provide himself with a graduated scale, a pair of set squares, a protractor, a compass and a hard pencil.

The questions on Theoretical Geometry will consist of Theorems contained in the annexed Schedule B, together with easy extensions and deductions with numerical illustrations. Any proof of a proposition will be accepted which appears to the Examiners to form part of a systematic treatment of the subject; the order in which the

theorems are stated in Schedule B is not imposed as the sequence of their treatment. In the proof of the theorems hypothetical constructions will be permitted.

(Candidates will be provided with squared paper.)

Schedule A.

Bisections of angles and of straight lines.

Construction of perpendiculars to straight lines.

Construction of an angle equal to a given angle.

Construction of parallels to a given straight line.

Simple cases of the construction from sufficient data of triangles and quadrilaterals.

Division of straight lines into a given number of equal parts or into parts in any given proportions.

Construction of a triangle equal in area to a given polygon.

Construction of tangents to a circle and of common tangents to two circles.

Simple cases of the construction of circles from sufficient data.

Construction of a fourth proportional to three given straight lines and a mean proportional to two given straight lines.

Construction of regular figures of 3, 4, 6 or 8 sides in or about a given circle.

Construction of a square equal in area to a given polygon.

Schedule B.

ANGLES AT A POINT.

If a straight line stands on another straight line, the sum of the two angles so formed is equal to two right angles; and the converse.

If two straight lines intersect, the vertically opposite angles are equal.

PARALLEL STRAIGHT LINES.

When a straight line cuts two other straight lines, if

- (i) a pair of alternate angles are equal, or
- (ii) a pair of corresponding angles are equal, or
- (iii) a pair of interior angles on the same side of the cutting line are together equal to two right angles, then the two straight lines are parallel; and the converse.

Straight lines which are parallel to the same straight line are parallel to one another.

TRIANGLES AND RECTILINEAL FIGURES.

The sum of the angles of a triangle is equal to two right angles.

If the side of a convex polygon are produced in order the sum of the angles so formed is equal to four right angles.

If two triangles have two sides of the one equal to two sides of the other, each to each, and also the angles contained by these sides equal, the triangles are congruent.

If two triangles have two angles of the one equal to two angles of the other, each to each, and also one side of the one equal to the corresponding side of the other, the triangles are congruent.

If two sides of a triangle are equal, the angles opposite to these sides are equal; and the converse.

If two triangles have the three sides of the one equal to the three sides of the other, each to each, the triangles are congruent.

If two right-angled triangles have their hypotenuses equal, and one side of the one equal to one side of the other, the triangles are congruent.

If two sides of a triangle are unequal, the greater side has the greater angle opposite to it; and the converse.

Of all the straight lines that can be drawn to a given straight line from a given point outside it, the perpendicular is the shortest.

The opposite sides and angles of a parallelogram are equal; each diagonal bisects the parallelogram and the diagonals bisect one another.

If there are three or more parallel straight lines and the intercepts made by them on any straight line that cuts them are equal, then the corresponding intercepts on any other straight line that cuts them are also equal.

AREAS.

Parallelograms on the same or equal bases and of the same altitude are equal in area.

Triangles on the same or equal bases and of the same altitude are equal in area.

Equal triangles on the same or equal bases are of the same altitude.

Illustrations and explanations of the geometrical theorems corresponding to the following Algebraical identities:—

$$k(a + b + c + \dots) = ka + kb + kc + \dots$$

$$(a + b)^2 = a^2 + 2ab + b^2.$$

$$(a - b)^2 = a^2 - 2ab + b^2.$$

$$a^2 - b^2 = (a + b)(a - b).$$

The square on a side of a triangle is greater than, equal to, or less than, the sum of the squares on the other two sides, according as the angle contained by those sides is obtuse, right, or acute. The difference in the case of inequality is twice the rectangle contained by one of the two sides and the projection on it of the other.

LOCUS.

The locus of a point which is equidistant from two fixed points is the perpendicular bisector of the straight line joining the two fixed points.

The locus of a point which is equidistant from two intersecting straight lines consists of the pair of straight lines which bisect the angles between the two given lines.

THE CIRCLE.

A straight line drawn from the centre of a circle to bisect a chord which is not the diameter is at right angles to the chord; conversely the perpendicular to a chord from the centre bisects the chord.

There is one circle and one only which passes through three given points not in a straight line.

In equal circles (or in the same circle), (i) if two arcs subtend equal angles at the centres, they are equal; (ii) conversely, if two arcs are equal, they subtend equal angles at the centres.

In equal circles (or in the same circle), (i) if two chords are equal, they cut off equal arcs; (ii) conversely, if two arcs are equal, the chords of the arcs are equal.

Equal chords in a circle are equidistant from the centre; and the converse.

The tangents at any point of a circle and the radius through the point are perpendicular to one another.

If two circles touch, the point of contact lies on the straight line through the centres.

The angle which an arc of a circle subtends at the centre is double that which it subtends at any point on the remaining part of the circumference.

Angles in the same segment of a circle are equal; and if the line joining two points subtends equal angles at two other points on the same side of it, the four points lie on a circle.

The angle in a semi-circle is a right angle, the angle in a segment greater than a semi-circle is less than a right angle, and the angle in a segment less than a semi-circle is greater than a right angle

The opposite angles of any quadrilateral inscribed in a circle are supplementary ; and the converse.

If a straight line touch a circle and from the point of contact a chord be drawn, the angles which this chord makes with the tangent are equal to the angles in the alternate segments.

If two chords of a circle intersect either inside or outside the circle, the rectangle contained by the parts of the one is equal to the rectangle contained by the parts of the other:

LUMSDEN MEMORIAL SCHOLARSHIPS AND GOLD MEDAL.

At a public meeting held at Benares on the 2nd August 1891, it was resolved, in view of the approaching retirement of the Hon'ble J. J. F. Lumsden, C.S., Senior Member of the Board of Revenue, United Provinces of Agra and Oudh, who during his long connection with these Provinces, and more particularly with the Benares Division, had endeared himself to all classes, that in order to perpetuate his memory, a fund be raised for the purpose of founding a medal and two scholarships. This fund, amounting to Rs. 7,000, has been vested in the Treasurer of Charitable Endowment for the United Provinces of Agra and Oudh. The interest is paid to the Registrar of the University of Allahabad and is expended by the Syndicate in the following manner:—

(a) The Syndicate awards every second year a scholarship called the "Lumsden Sanskrit Scholarship" of the value of Rs. 10 now reduced to Rs. 8 *per mensem*, as Government Promissory Notes are reduced to $3\frac{1}{2}$ *per cent.* and tenable for two years to the student who passes the Intermediate Examination of the Allahabad University and obtains the highest number of marks in Sanskrit, among those who take up Sanskrit as their second language. The scholarship is awarded subject to the condition that the student continues his studies for the B.A. Examination in a College affiliated to the University of Allahabad.

(b) The Syndicate also awards every second year a Scholarship called the "Lumsden Arabic or Persian Scholarship" of the value of Rs. 10 (now Rs. 8 only) *per mensem*, and tenable for two years, to the student who passes the Intermediate Examination of the Allahabad University and obtains the highest number of marks in Arabic among those who take up Arabic as their second language. The scholarship is awarded subject to the condition that the student continues his studies for the B.A. Examination. If no student passes the Intermediate Examination with Arabic as his second language

in the year in which the scholarship is awarded, the scholarship will be awarded on the same conditions to the student who passes the said examination and obtains the highest number of marks in Persian as his second language.

(c) The Syndicate also every year awards a gold medal of the value of not less than Rs. 50 and not more than Rs. 60, called the "Lumsden Medal," to the student who stands highest in the examination for the Degree of Bachelor of Laws of the Allahabad University.

(d) If a student holding either of the scholarships discontinue his studies, die, or through misconduct or any other cause be considered by the Syndicate disqualified to hold the scholarship, it will be given for the rest of the term of two years to the next best student of the same year who fulfils the requirements laid down in clauses (a) and (b) above.

2. The Syndicate awards one of the aforesaid scholarships alternately every year commencing with the "Lumsden Sanskrit Scholarship" in 1893 and the "Lumsden Arabic or Persian Scholarship" in 1894.

3. The Syndicate will, from time to time, invest in Government securities any surplus that may remain over annually, after meeting the cost of the scholarships of the medal and incidental charges, and will apply at their discretion the interest received from this source towards increasing the value or number of the scholarships.

REPORT OF THE COUNCIL OF THE SENATE ON
THE REGULATIONS FOR THE AFFILIATION
OF THE UNIVERSITY OF ALLAHABAD.

23rd October, 1916.

The Council of the Senate beg leave to report to the Senate as follows :—

In their Report on the Regulations for the Affiliation of the University of Calcutta (Reporter, 11th May, 1915, page 854), in which they proposed that Bachelors of Science of that University should under certain conditions be admitted to the privileges of Affiliation, the Council stated that they would at a later date make proposals with regard to the recognition for the purposes of affiliation of Bachelors of Science of other Indian Universities. They are now prepared with such proposals for the University of Allahabad. The proposals follow the general lines adopted in the case of Calcutta.

The Council accordingly recommend that Regulation 2, relating to the Affiliation of the University of Allahabad (Ordinances, page 286), be rescinded, and that the following Regulation be substituted for it :—

2. That any matriculated student of the University of Allahabad be entitled to be admitted to the privileges of Affiliation provided (1) that he has, in accordance with the regulations of that University, studied for not less than two years at one or more Institutions for the education of adult students affiliated up to the standard for graduation, and (2) that he has in the Matriculation Examination or in some higher examination of the University of Allahabad satisfied the examiners in Greek, Latin, Hebrew, Sanskrit, Arabic, Persian or Pali, and (3) that he has passed in the First Division in the Intermediate Examination in Arts or in Science, or has passed

B.—COLLEGES OF THE UNIVERSITY.
EWING CHRISTIAN COLLEGE, ALLAHABAD.

Re-Inspected—2nd March, 1920.

AFFILIATED IN ARTS, 1903, 1905 AND 1908; IN
SCIENCE, 1905 AND 1909.

In October, 1846, the British East India Company transferred its College work at Allahabad to the American Presbyterian Mission. When the British Civil Station was removed from the Jumna in 1853, the Mission purchased the Court building for educational purposes and started a Collegiate School. After a few years College classes were abolished and School classes alone continued, the institution being known as the Jumna Mission School or the A. P. Mission High School.

In 1900 the American Presbyterian Mission decided to reopen College work at Allahabad, and the First Class was begun in 1902. In order to keep School and College separate, the old Court building was demolished and a new School building erected at the western end of the Jumna compound, thus leaving the eastern end free for the College buildings and campus.

The College end contains the following buildings:—A main College building with an Assembly Hall to seat 1,000; a Laboratory for Physics and one for Chemistry; an Infirmary; ten residences for members of the Staff; five Hostels, the total accommodation being approximately 200. Four of the Hostels are arranged with suites of rooms for one or more unmarried Professors.

Two hundred and seventy acres of land were acquired for an Agricultural Department immediately opposite the College on the Jumna, and courses were begun from July, 1912. This department has now become the Allahabad Agricultural Institute.

The number of students enrolled in 1919-20 was 422.

In 1895 it was affiliated to the Allahabad University up to the Intermediate standard. The first year class was opened in July, 1895, and the second year in July, 1896. The School-leaving Certificate classes were opened in 1908. It was affiliated temporarily to B.A. standard in 1914, 3rd year class was opened in July, 1914, and the 4th year class in July, 1915. In April, 1919, the College was permanently affiliated up to the B.A. standard in English, History, Mathematics, Persian and Sanskrit and provisionally in Economics.

The Institution was registered on August 2nd, 1893, under Act XXI of 1860, the chief controlling authority being the President for the time being, assisted by a Committee of Management. Its income is derived from an endowment of property made mainly by the late Munshi Kali Prasad, and partly by others which amounted to Rs. 9,20,673-5-3 on the 30th of June, 1915, and also from a Government grant.

The Institution is divided into a College and a School Department, the former under the immediate charge and the latter under the superintendence of the Principal.

The scale of fees in the College Department is Rs. 5-8-0 and Rs. 6-8-0 *per mensem*, payable during ten months in the session. In the School Department the scale of fees is proportionate to the income of guardians of boys, *Chitragupta Vunshi* Kayasthas paying lower fees than students belonging to other castes. There is a large number

of free scholars in both College and School Departments belonging mainly to the Kayastha community. Kayastha students, moreover, receive monthly scholarships and aid, the total amount spent yearly for this purpose exceeding Rs. 3,000. There are now two Boarding-houses, one for the College and the other for the School students.

AGRA COLLEGE, AGRA.

AFFILIATED IN ARTS AND IN LAW, 1889; IN SCIENCE, 1896.

In 1818 Pt. Ganga Dhar Shastri bequeathed to the East India Company the rents of certain lands in the districts of Aligarh and Muttra for the promotion of education. In accordance with the Shastri's Will Agra College was opened in 1823, the endowment then yielding over Rs. 22,000 a year. Subsequently Government added to the income and raised the College to its present status.

In 1883 the management was transferred to a Board of Trustees. At the time of the transfer the Trustees made an appeal to the noblemen and gentlemen of the Province of Agra, and a lakh of rupees was added to the endowment while the capital of the Scholarship Fund was raised from Rs. 25,000 to Rs. 57,500. The Maharaja of Bharatpur maintains additional scholarships.

The immediate control of the College is in the hands of a Committee, two of the members of which are official, the rest nominated by the Trustees.

The College formerly consisted of two departments, *viz.*, the College proper under a Principal, and the School under a Head-master. But in July, 1909, the School Department was handed over to Government by the Trustees in order that they might be free to devote all their resources for the benefit of the College.

There are 609 students enrolled in the Arts and Science classes of the College Department and 86 in the Law Department.

There are 330 College students resident in the College hostels, and more than 75 in the Caste Boarding-houses.

A scheme has been submitted to Government for the establishment of an Agra University. The Agra College has applied conjointly with the St. John's College for recognition as a University College by the Allahabad University.

ST. ANDREW'S COLLEGE, GORAKHPUR.

Inspected—8th January, 1913, and 2nd February,
1918.

AFFILIATED IN ARTS, UP TO B.A., 1916.

This College is under the general control of the Church Missionary Society and a governing body, of which the Bishop of Lucknow is *ex-officio* Chairman.

The College is now housed in a very fine new building which was opened by His Honour the Lieutenant-Governor of the United Provinces of Agra and Oudh on January 6th, 1916.

There is Hostel accommodation in the new College compound under the direct supervision of Indian resident Wardens.

The subjects taught in this College and even the combinations of these subjects are strictly limited.

Only certain combinations of the following subjects are taught :—

B.A. English, History, Philosophy.
 Persian, Sanskrit and
 Mathematics.

All teaching is on a tutorial basis. Most of the teaching is given in small tutorial classes. By this means Professors are able to take a more personal interest in the work of each individual student. In order to keep the tutorial classes sufficiently small the number of fresh admissions every year is strictly limited, so that application should be made early.

Organised games of some kind or other are compulsory unless the student brings a satisfactory Doctor's certificate to show that he is physically unfit.
